About Cibus

Cibus is a leader in gene edited productivity traits that address critical productivity and sustainability challenges for farmers such as diseases and pests which the United Nations estimates cost the global economy approximately \$300 billion annually. Cibus' long-term focus is productivity traits for farmers for the major global row crops. Cibus is not a seed company. It is a technology company that uses proprietary high-throughput gene editing technology to develop at a fraction of the time and cost of conventional breeding and to license them to seed companies in exchange for royalties on seed sales.
