About Cibus

Cibus is part of the multi-billion-dollar plant seed industry. Cibus is a leader in the new era of high throughput gene editing technology that can develop plant traits precisely and predictably at a fraction of the time and cost of conventional breeding. Cibus is not a seed company. It is a technology company that develops and licenses traits to seed companies in exchange for royalties on seed sales. Cibus' target market is Productivity Traits that improve yields, lower input costs such as chemicals, and increases the sustainability and profitability of farming. It has a pipeline of six productivity traits including important traits for pod shatter reduction, disease resistance, and nutrient use efficiency. Cibus' focus is scale, multi-crop traits that can impact greater than 100 MM acres.
