

Cibus to Report Second Quarter 2024 Financial Results on August 8, 2024 After the Market Close and Host Conference Call

August 1, 2024

SAN DIEGO, Aug. 01, 2024 (GLOBE NEWSWIRE) -- Cibus, Inc. (Nasdaq: CBUS), a leading agricultural technology company that develops and licenses plant traits to seed companies for royalties, today announced that the company will report second quarter 2024 financial results on Thursday, August 8, 2024. Cibus' management team will host a conference call and audio webcast at 4:30 p.m. ET on that day to discuss the financial results and other company updates.

Title: Cibus, Inc. Second Quarter 2024 Results Conference Call
Event Date: Thursday, August 8, 2024
Time: 4:30 p.m. ET
Participant Numbers: +1-800-343-5172 (U.S.), +1-203-518-9856 (International)
The conference ID "CIBUS" or 24287 will be required for entry
Event Link: <https://investor.cibus.com/events>

For interested individuals unable to join the conference call, a dial-in replay of the call will be available through Thursday, August 22, 2024 and can be accessed by dialing +1-844-512-2921 (U.S.), +1-412-317-6671 (International) and entering replay passcode: 11156392.

A live audio webcast of the call, along with accompanying slides, will be available under "News & Events" in the Investor section of the Company's website, investor.cibus.com. An archived webcast will be available on the Company's website for 90 days after the event.

About Cibus

Cibus is a leader in gene edited productivity traits that address critical productivity and sustainability challenges for farmers such as diseases and pests which the United Nations estimates cost the global economy approximately \$300 billion annually. Cibus is not a seed company. It is a technology company that uses gene editing to develop and license traits to seed companies in exchange for royalties on seed sales. Cibus' focus is productivity traits for farmers for the major global row crops with large acreage such as canola, corn, rice, soybean, and wheat. Cibus is a technology leader in high throughput gene editing technology that enables Cibus to develop and commercialize plant traits at a fraction of the time and cost of conventional breeding. Cibus has developed a pipeline of five productivity traits including important traits for Pod Shatter Reduction, Sclerotinia (disease) resistance, and weed management. Its initial traits for Pod Shatter Reduction and weed management are in commercial development with leading seed companies such as Nuseed Americas Inc. in Canola as well as Nutrien Ltd. and Interoc S.A. in Rice in the United States and Latin America. Its other pipeline traits including Sclerotinia resistance are in advanced greenhouse and field trial stages.
